Daniel Vásquez

Product Engineering · Agentic Delivery Systems

Leading product since 2012, from zero-to-one to Fortune 100 scale — now shipping production software with multi-agent teams, and building the operating system they run on.

PROFILE

I build production software with teams of AI agents, and I design the operating system those teams run on. Three products are live today: an agentic product-management platform, a no-commission marketplace for Mexico, and the open-source plugin framework both are built with.

Before that, more than a decade of product leadership from zero-to-one to Fortune 100 scale — a $70M+ global rewards portfolio and a product and engineering organisation of 70+ people at AB InBev, post-M&A systems integration at Linio through the Falabella acquisition, and ventures of my own, one of them acquired.

The through-line is turning ambiguity into systems: a delivery cadence humans and agents can both follow, with risk-tiered merge gates, independent cross-model review, and written retrospectives that feed the next session instead of dying in a folder. Agile, rebuilt for a team where most of the contributors are not people.

AT A GLANCE

Since 2012 Leading product teams · **$70M+** Portfolio owned at AB InBev · **70+** People led, product & engineering · **3** Products running in production · **4** Ventures founded, one acquired · **MSc** Finance, University of Aberdeen

EXPERIENCE

Golden Frijoles

2025 — Present

Founder & Product Lead · Agentic product-management platform

- Built and shipped a commercial multi-tenant SaaS: telemetry ingest and a TypeScript SDK, a TARS adoption funnel, North Star metrics, a typed feature-flag control plane, A/B experiments and signed webhook delivery — one primitive set in place of five stitched-together vendors.
- Designed the governance model that lets agents investigate, propose, and act inside bounds: scoped credentials, staged actions, explicit human approval, and an append-only record.
- 87 initiatives shipped to production on Next.js, Supabase and Vercel, behind 157 Playwright specs, with tenancy enforced by row-level security and no cross-project read path derived from the request.
- Now the flag control plane for the Miyagi Sánchez marketplace — a complete 40-key cutover with policy-bound circuit breakers.

Product Ops · DevOps · SecOps · FinOps on one set of rails · free tier live, paid tier and Pods by arrangement

Miyagi Sánchez

2025 — Present

Founder & Product Lead · No-commission marketplace for Mexico

- Multi-seller marketplace on Medusa v2 and Next.js: anyone can list products, services, rentals, digital goods, subscriptions or events and sell with no commission.
- One catalogue reaches buyers four ways: the marketplace, a seller's own domain, an embeddable widget, and AI shopping agents over MCP and UCP endpoints.
- 147 epics shipped across ten product domains — discovery, checkout and payments, shipping, trust and messaging, agentic commerce, promotions, ticketing — each closed with a written retrospective.
- Runs on Cloud Run and Cloud Build behind Cloudflare, with an ad-funded print edition as the first revenue channel.

Payments · marketplace trust · agent-readable commerce · ~1,000 commits across backend and storefront

dobby-foundation

2025 — Present

Creator · Open-source ways-of-work for agent teams

- An agent plugin and project template — five skills: refine, setup, strategy, smoke tests and reporting — installed once per project and updated from one place, so an improvement reaches every project without fork drift.
- CI guards enforce portability: a leak checker keeps project-specific residue out of every shipped skill, and a contract audit fails the build when a skill declares a dependency nothing provides.
- Reproducible, byte-for-byte skill packaging so the same methodology loads into both Claude Code and Cowork.

The methodology as a product — extracted from a live codebase, now shipped as the open Golden Frijoles kit (Apache-2.0)

AB InBev

2020 — 2023

Global Principal Product Manager · Largest brewer worldwide

- Built the global rewards ecosystem across Central America, Europe and South Korea.
- Led a 70+ person cross-functional product and engineering organisation.
- Owned a $70M+ portfolio, with campaigns activated at the Super Bowl and The Voice Brasil.

Linio Group

2019 — 2020

Group Product Manager · Mexico City

- Directed post-M&A systems integration through the Falabella acquisition.
- Unified multi-platform infrastructure across the merged organisations.

Bicimensajero.com 2014 — 2016

Founder · On-demand bike logistics

- Built the full stack solo, in a pre-AI landscape.
- Scaled operations to 100+ messengers.
- Negotiated the acquisition exit.

CTIN 2012 — 2014

Team Lead · Centro de Tecnología e Innovación

- Led a Bitcoin remittance platform to 5,000+ active users.
- Authored the platform proposal to América Móvil / Grupo Carso.

Second team: a gamified coding-literacy comic platform for children

HOW I WORK

- Plan, build, ship — one user story at a time, with a deterministic gate that has to be green before anything merges.
- Risk-tiered review: agents can merge low-risk work on green CI; anything touching money, auth, or database migrations is always a human merge.
- Cross-family review on every pull request — the diff gets an independent pass from a different model family before it lands, and every finding is fixed or answered.
- Model tiering by task: the stronger model grooms, plans, and reviews; once slices are approved, execution runs on the faster one.
- Every epic closes with a retrospective, and durable learnings are promoted into a shared digest that every new session reads first.
- Grooming is the front door: a raw ask is reframed onto existing platform primitives before anything new gets built.

EARLIER CAREER

Wagento Commerce — Head of Customer Experience & Project Management 2017 — 2019

MagmaLabs — Senior Product Manager 2016 — 2017

Pokapok.mx — Founder — corporate wellness platform 2016 — 2017

Nuuch Tech — Founder & Principal Consultant — Magento, CRM, agile coaching 2012 — 2015

Grupo Bimbo — FinOps Analyst 2010 — 2011

CompuCom · Accenture — Tech Support · Customer Service 2006 — 2010

EDUCATION

MSc Finance — University of Aberdeen · Scotland 2023

Bachelor's, International Trade and Business — Escuela Bancaria y Comercial · Mexico City
